

In year 1 we will be using our construction area inside to make lots of different things, and using our outdoor construction area to work together on some bigger builds!

Key things to remember:

Some children will be doing forest school sessions each **Friday**, if your child is in the current group they will receive an email.

PE days are **Monday** and **Friday**.

## Build it!

### The big idea

We are exploring building in different ways to create different sculptures, objects and buildings.

#### As historians and geographers we will:

- Find out more about Guy Fawkes and why we celebrate bonfire night.
- Find out more about the world wars and why we reflect on Remembrance Day.
- Find out about other key events like the first flight.
- Make and read maps, including keys and symbols.

#### As readers and writers we will:

- Read some animal information books and write non-chronological reports about owls
- Read and write about the Frog Prince
- Write some letters and poetry, all based on different traditional tales

#### As artists we will:

- Use different artistic techniques to make different sculptures.
- Practise artistic skills like plaiting

#### As scientists we will:

- Learn about the human body

#### How you can help at home:

- Keep reading daily with your children. The phonics books they bring home are what **they read to you** and any library books they bring back are for **you to read to them**.
- See what you can make with your children at home. You can send in pictures or bring your models in for show and tell!
